Stock Market Review: During the month of January 2019 KSE-100 (the benchmark) posted a handsome gain of 10.07% to close the month at 40,800 points, primarily on the back of long-awaited foreign buying. Foreign investors remained net buyer with the inflow of US\$16.18 million during the month under review, as compared to outflow of US\$28.41 million in previous month.

Major sectors such as E&Ps, Fertilizers and Commercial Banks outperformed the market generating positive returns of 17.82%/10.19%/9.97% respectively. E&Ps surged due to start of drilling in Indus Basin which is a high potential zone capable of drilling significant flows. Fertilizer sector moved back and forth on expected GIDC reduction/removal in the favor of fertilizer companies; however generated overall positive return on market expectation of fertilizer companies retaining the benefit. The only major sector contributing negatively to index's return was Chemicals that retreated on margins' contraction. Another reason was price correction as Chemicals had been witnessing a continuous rally in previous months.
