Market Review: The KSE-100 Index commenced FY26 on a strong footing, posting an impressive gain of 13,763 points to end the month near an all-time high of 139,390 points. The rally was primarily driven by improving macros, with SBP reserves climbing to a 40-month high of USD 14.5bn— surpassing the SBP earlier projection of USD 14.0bn. Additionally, investors' sentiment was further lifted by S&P Global's upgrade of Pakistan's sovereign credit rating to B- from CCC+, reinforcing confidence in the country's improved external financing outlook. Additionally, expectations of softer U.S. tariffs on Pakistani exports added to the positive sentiment, reinforcing investor optimism during the month. Lastly, robust corporate profitability—particularly among key index heavyweights—along with healthy dividend announcements, further bolstered investors' confidence and sustained market interest. The market activity tilted towards heavy weights as average traded volume decreased by 4.2% MoM to 766.2mn shares while the average traded value improved by 19.4% MoM to USD 125mn. On the flows front, foreign investors remained net sellers, recording a net outflow of USD 31.7mn. Among local participants, Banks and Others participants emerged as net sellers with outflow of USD 54.5mn and 20.3mn. Meanwhile, buying activity was observed from Mutual Funds and Individuals with cumulative net inflow of USD 99.5mn. On the sectoral front, the bulk of the gains were led by Commercial Banks, Fertilizers, and Investment Companies, contributing 6,521, 2,390, and 965 points to the index, respectively. In contrast, the Glass and Refinery sectors faced selling pressure, collectively weighing down the index by 68 and 52 points, respectively. In the short-term market participants will closely monitor macroeconomic indicators and the government's efforts to comply with EFF facility conditions ahead of the next IMF review in September 2025.

Investment Objective: The objective of First Capital Mutual Fund is to augment wealth of investors through investments geared towards securing maximum returns while simultaneously offsetting resultant risks through efficient diversification across sectors with low correlation amongst them. The management of the fund is continuously striving towards achieving its objective.
